

TOP TIPS FOR FREEZER MAINTENANCE

CLEANING

- EXTERNAL BODY - neutral soap and water
- STAINLESS STEEL - warm water, mild detergent and dry with a dry cloth
- GLASS - any glass cleaning product
- PLASTIC - warm water and mild detergent
- NO SOLVENTS OR ALCOHOL

VENTILATION MAINTENANCE

- OPEN THE VENT GRILL ON THE UNIT
 - Carefully loosen and take out each screw to remove the ventilation grill
- THOROUGHLY CLEAN THE VENT
 - Using a vacuum cleaner or soft brush, clean the condenser thoroughly. This area builds up with dust which reduces performance
- GREATER EFFICIENCY
 - Regular maintenance of the condenser can drastically improve energy efficiency and equipment performance

LOCATION & AIR-FLOW

- Place 10cm away from wall/appliances
- Don't block any of the vents
- Keep away from sources of heat

SEASONAL USE

- Ensure the product is thoroughly clean and dry when preparing for use
- Leave doors open when not in use to avoid bad odours
- Switch on once fully clean and dry
